

# SAY NO TO COUNTERFEIT!

For some time WD-40 has noticed that certain traders are selling WD-40 fake / counterfeit material in the market. We are warning everyone that dealing with counterfeit material is a criminal offence and anyone involved in such activity can be legally prosecuted.

## Some facts that we would like to share with you:

1. WD-40 does not have a factory in China and manufactures only one quality.
2. The fake material is filled with propane / butane whereas the genuine WD-40 is always filled with CO2 which is much safer.

## How to recognise the fake material?

The original can, filled with CO2 has 4 dents / crimp marks / notches.

The fake product has 8 dents / crimp marks/ notches.

### ORIGINAL

4 dents / crimp marks

### FAKE/ COUNTERFEIT

8 dents / crimp marks

Please pay attention to these details when you are purchasing WD-40. In case you have any doubt please contact the official WD-40 distributor.

**PROTECT YOUR CUSTOMERS, IDENTIFY COUNTERFEIT  
MAKE SURE YOUR CUSTOMER GET'S WHAT HE PAYS FOR**
